

BMD12083 Introduction to Multimedia Technology
Assignment 2

Lecturer: Behshadjalalian
Email: Behshadjalalian@raffles-university.edu.my

Due Date	: By week 9
Marks	: 100 marks (Weighting: 30 %)
Total SLT	: 9 hours

CLOs:

At the end of the assignment, the student is expected to be able to:

1. Develop your knowledge and understanding of the underlying concepts and theories of the Multimedia System.
2. To outline and critically analyze the different elements of the Multimedia System.
3. Develop student's competence in understanding the concept and developing applications of Multimedia Technology.
4. Provide the necessary details on how multimedia data are represented, stored, compressed and used

Assignment 2 (100 marks):

Student is required to **perform comprehensive research on an emerging trend of multimedia industry**. Form a group of 2 students for this assignment.

Task 1: Multimedia Technology Research

1. **Choose one of the following multimedia technologies** as research topic:
 - a. Virtual Reality
 - b. Augmented Reality
 - c. Projection Mapping
2. Based on the chosen topic, **propose 4 industries that benefits from it**. Discuss with lecturer regarding which industry can be explored.
3. For each of the industry, find at least **2 case studies of how such technology is used**.
4. Conduct further reading to understand the impact or potential of such technology with examples and demonstration.

Task 2: Research Presentation Report

1. Based on the findings in Task 1, **prepare a research presentation report in PPT**. Information must be as brief, written in your own words, and DO NOT put in paragraphs of information in your slides.
2. The presentation report must include:
 - a. Introduction of the chosen multimedia technology: definition, history, technical specification
 - b. Industry explanation
 - c. Case Studies (with photo & references)
 - d. Conclusion (future development of the technology)
 - e. Resources (cite the sources used for your research)

Task 3: Proposal & Mockup

1. **Propose one local restaurant**. Do not choose international franchises.
2. Based on your chosen multimedia technology, **propose how will that technology benefit the restaurant**.
3. Come up with **moodboard, sketches, and designs** that is applicable to use with that multimedia technology.

Task 4: Presentation & Submission

1. Submit the Task 2 Research Presentation Report and Task 3 Proposal.

A softcopy of the assignment to be prepared and submit on the same day as the presentation.

ASSESSMENT CRITERIA

CLO	Criteria	Poor (0-2 marks) D	Fair (3-5marks) C	Good (6-8marks) B	Excellent (9-10 marks) A	Weighting
1, 2	Background Research: Perform detail research on the multimedia technology, including its definition, history and technical specification					3
2, 3	Industry Adaptation: Explain the nature of the industry and the pain points. Elaborate why the industry adapts multimedia technology to overcome its challenges.					3
3, 4	Case Study: Provide a clear case study of how the multimedia technology is adapted into the client / user workflow / operation.					3
4	Assignment Format & Presentation: Able to present the research finding in confident manner. Able to handle question and answer from the audience.					1
